RE: Conflict Minerals Policy Statement

On August 22, 2012, the Securities and Exchange Commission (“SEC”) published the final regulations implementing the conflict minerals reporting obligations of Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (“Dodd-Frank Act”). Section 1502 of the Dodd-Frank Act requires, in part, SEC registrants whose products contain metals derived from conflict minerals (generally, tantalum, tin, tungsten, and gold), to report annually to the SEC. This reporting requirement was based upon concerns that the current humanitarian crisis in the Democratic Republic of Congo and surrounding countries has been financed by profits originating from the mining and transport of conflict minerals.

Although, as a private company MC Assembly is not subject to the provisions of the Dodd-Frank Act as written, we support ending the violence in such areas and are committed to the pursuit of responsible procurement practices to support that end.

As an assembler of electronic components (not a manufacturer of components), MC Assembly is contractually bound to procure components only from the Approved Vendor List (AVL) supplied to us by our customers.

MC Assembly supports the efforts of the Electronic Industry Citizenship Coalition (EICC) and Global e-Sustainability Initiative (GeSI) and our customers to address conflict mineral issues. Vendors will be asked to comply with the conflict mineral due diligence practices and policies of MC Assembly and its customers.

In order to assist our customers to comply with the Dodd-Frank Act, MC Assembly is in the process of obtaining information from approved vendors concerning the origin of the metals that are used in the products made by MC Assembly. Vendors are requested to provide written evidence of due diligence documenting that raw materials used to produce gold, tin, tantalum and tungsten, supplied to or used in the products made by MC Assembly do not originate from mining or smelting operations in the Democratic Republic of Congo and surrounding countries. Due diligence from each supplier will include, where applicable, requested completion of the EICC-GeSI Conflict Minerals reporting template, available at www.conflictreesmelter.org.

Tom Rossi
Vice President of Procurement/Materials
